Experience

Software Engineer — **Business-expert** — *Giza* — **01/2026 – Present**

- Develop and deliver end-to-end software solutions as a full-stack engineer using .NET and Next.js, building scalable backend systems and AI-powered features to enhance user experience and product efficiency.
- Ship 100+ features and enhancements across web and mobile applications.
- Work as a Forward Deployed Engineer, embedded with 2 customer teams to understand their business needs and turn them into working AI solutions on the BusinessExpert.AI platform.
- Integrate the platform with customer systems and data, and support customers through rollout, feedback, and continuous iteration.
- Build and maintain the company website and its admin panel, covering UI, frontend, and backend.

Software Engineer — **IJD Creatives** — *New Cairo* — **05/2025 – 01/2026**

- Developed advanced mobile applications as a mid-level developer, delivering high-performance solutions and enhancing overall user experience.
- Built and published Waffer on Google Play, an app that lets businesses manage discounts, coupons, and seasonal offers for consumers.

Software Engineer — **ATW Ltd.** — *Giza* — **07/2023 – 05/2025**

- Boosted user engagement by 70% through the design of intuitive and user-friendly interfaces.
- Enhanced existing app functionalities and introduced numerous innovative features, significantly boosting competitive market positioning.
- Leveraged the Flutter framework to develop cross-platform mobile applications, achieving over 5,000 downloads and a 5-star rating on both Google Play and the App Store.
- Developed 2 applications utilizing machine learning for text-to-speech and speech-to-text functionalities, tailored to different audiences.
- Led teams and managed large-scale application projects as the project owner.
- Used a diverse range of modern technologies and programming languages to build mobile applications with consistently optimal performance, strong functionality, and seamless user experiences.
- Maintained 8 projects, enhanced features, refactored code, and added new functionalities.
- Optimized the submission process, gaining valuable experience in Apple's review policies and best practices.

Education

Bachelor of Computer Science — **October 6 University** — *Egypt* — **09/2019 – 06/2023**

- Grade: Very Good, GPA: 3.4 / 4.0 | Graduation project: Excellent

Projects

- **Business Expert AI** (.NET, Next.js): Building an enterprise AI platform for decision intelligence, autonomous software delivery, and AI-powered business functions across banking, healthcare, and government; working on both the website and its admin panel. Website: **business-expert.ai**

- **Horus Fitness** (Next.js, Django): Built a full-stack fitness platform (Next.js web app and Django admin) offering personalized workout plans, progress tracking, and live events to help users build strength, stay motivated, and achieve their fitness goals. Website: **horusfitness.com** | **Admin Panel**

- **Book SPA** (Flutter): Developed a mobile application that connects customers with spa stores to book services and make secure online payments, while enabling stores to manage services and bookings.

- **Waffer** (Flutter): Developed a mobile application that allows businesses to register and manage discounts, coupons, and seasonal offers, delivering a user-friendly interface for consumers to discover current promotions. Get the App: **Google Play**

- **Ur path** (Flutter): Developed a mobile application that explores and registers for training courses with secure online payment.

- **Tamyaz** (Flutter): Developed a platform that connects subscribers with accredited providers, offering exclusive discounts, and supports organizations in engaging employees, enhancing loyalty and service delivery.

- **Yama Vet** (Flutter): Developed a pet care app that lets pet owners request medical services for their pets directly from their homes at any time. Get the App: **Google Play** | **App Store**

Giza, Egypt | linkedin.com/in/karim-abd-el-raouf-623bb21b4 | +20 1289575004 | karimzraouf@gmail.com | github.com/KarimRaouf

- **Alazaizy Group** (Flutter): Developed a multi-role inventory management app where storekeepers request supplies, track orders, and managers (technical, financial, purchasing) review, approve, or postpone orders.

- **Adltix** (Flutter): Developed a WebView-based mobile app for ADLTIX Marketplace, a leading influencer marketing platform connecting advertisers and influencers on a commission-based model. Get the App: **Google Play** | **App Store**

- **ATW Team** (Flutter): Developed an app for company teams that includes chats, emails, audio and video calls, task management with hours tracking, a learning management system, and attendance tracking.

- **STC** (Flutter): Developed a comprehensive company management app with features for attendance, vacations, tasks, projects, assets, and timesheets.

- **Islamic Apps** (Flutter): A collection of Islamic mobile apps:
  - **Mushaf**: developed a digital Quran app with features for reading, listening, search, dhikr, downloads, and translations. Get the App: **Google Play** | **App Store**
  - **Quran for Blind**: developed an accessible Quran app with speech recognition, voice memorization, text-to-speech interaction, and downloadable reciter voices. Get the App: **Google Play** | **App Store**
  - **Adhany**: developed an app that provides prayer time notifications based on the user's accurate location.
  - **Duaay**: developed an app where users express emotions, receive relevant prayers via a chatbot, post them publicly, and track anonymous prayers from others. Get the App: **Google Play** | **App Store**

- **Eslam Portfolio** (Next.js, Supabase): Designed and built end to end (UI/UX, frontend, and backend) a portfolio website for a filmmaker and reel creator, with a filterable video gallery, services and contact sections, and an admin panel to manage content. Website: **eslam-portfolio-tau.vercel.app**

Awards: **ICPC**: an algorithmic programming contest for college students
